January 2018

WORKS NOTIFICATION: Site investigation works

Site investigations January-April 2019

In the upcoming months we will be continuing site investigation works within the Port to City precinct. This is to further identify utility services located in the project areas and better understand ground and road conditions before we commence construction.

Investigation works will include:

- electronic scanning of roads and footpaths
- non-destructive digging to identify underground services such as gas and water
- drilling bore holes up to 40 metres in depth
- removing some vegetation in work zones if required

What to expect

- Works completed both during the day and at night time
- Traffic management will be in place to manage changed conditions including temporary access changes to car parking spaces and signage to guide road users and cyclists
- Potential traffic lane closures at night will be in place at times. All lanes will remain open during the day. For the latest traffic updates visit westgatetunnelproject.vic.gov.au/travel disruptions/
- We will notify you if there are any significant changes to the timing of our works

Please note that works may be rescheduled in the event of bad weather or other unavoidable circumstances.

For updates and more information about our works please visit westgatetunnel.vic.gov.au or contact us using the details over the page.
